BPA-FREE

The Body Glove portable CounterTop system features exclusive one-micron filtration with a revolutionary quick-disconnect diverter. The Body Glove CounterTop is an affordable way to ensure high quality, great tasting drinking water for the home and office. With no holes to drill or special install connections, the CounterTop easily connects to existing kitchen faucets, affording great tasting, filtered water without any installation hassle. The system is portable, which allows for convenient moving of the filter when necessary. System includes an attractive chrome housing making any home or office counter installation a perfect fit.

The CounterTop System has been tested by National Testing Laboratories and meets and or exceeds NSF/ANSI Standard 42. All materials are FDA food grade approved. Each filter delivers outstanding taste and odor reduction, superb water clarity with greater than 99.8% chlorine reduction for 2,500 gallons. The CounterTop provides 1 gallon per minute flow rates.

CounterTop System Includes:

CounterTop unit with one 2,500 gallon filter, attached diverter hoses, diverter valve, plastic spanner wrench (for removing housing when changing filters), filter-change electronic monitor and owner's manual.

Dimensions: Width: 5" Height: 8.25" Depth: 5"

Filter Capacity: 2,500 gallons (replace filter after one year or if flow becomes significantly reduced.)
